Subject Index

Abundance, polyploids, 243
Acceleration, running animals, 281
Acid rain, canopy exchange, 423
Activity, tortoise, 203
Agave, root water relations, 125
Algae (marine), photosynthesis, 377; 387
Allometry:
  basal metabolic rates, 25
  egg size, insects, 229
  reproduction energy investment, 105
  tropical saplings, 399
Alpine, photosynthesis, 179
Amoeba, grazing cyanobacteria, 99
Andropogon virginicus, photosynthesis, 145
Anoxia, tolerance in barley, 49
Aphids:
  parental investment, 105
  reproductive cost, 321
Argyrodendron, 169
Asellus, parental investment, 105
Aster, photosynthesis, 145

Barley, anoxia and flooding tolerance, 49
Betula pubescens, growth in subarctic conditions, 37
Blackthorn:
  flowering phenology, 261
  nectar production, 251
Blue-green algae, grazed by amoeba, 99
Body size:
  gulls, 275
  reproductive strategy, 223; 229
Bouteloua gracilis root dynamics, 117
Bramble:
  flowering phenology, 261
  nectar production, 251
Branching architecture, tropical saplings, 399
Bromus tectorum, photosynthesis, 139
Brood size, in isopod, 13

Canopy:
  throughfall ion-exchange, 423
  tropical forest, 169
Carabidae, energy budget, 109
Carbon dioxide:
  altitude effects, 179
  enrichment on plant growth, 139; 145
Castanospermum gas exchange, 169
Cepaea spp., competition, invasion, 91
Cladocera, growth model, 223
Clones, functional ecology, 63

Competition:
  food quality, 359
  land snails, 91
  meaning of, 297; 304
  model, 237
  succession, 145
Coexistence, competition model, 237
Cooling, homeotherms, 151
Chorthippus, reproductive effort, 215
Cyanobacteria, grazed by amoeba, 99

Dactylis glomerata, dry soil root penetration, 19
Defence, in plants, 73
Diet and habitat, 25
Digestion, marine predators, 287
Distribution, feeding preference, 369
Drought, root dynamics, 117

Ecotypes, cocksfoot grass, 19
Ectotherm, tortoise behaviour, 203
Egg size, insects, 229
Energy:
  balance, tropical pioneer tree, 3
  budget:
    Nephelopsis, 45
    carabid beetle, 109
  parental investment, 105
Enzyme activities, flight muscle, 353
Equilibrium models, 297; 304
Evolution, polyploid, 243

Feeding selectivity, 99
Fat reserve, estimation, gulls, 275
Feeding preference, grasshoppers, 369
Fish, parental investment, 105
Flooding tolerance, barley, 49
Flowering phenology, Rosaceae, 261
Food quality, competition, 359
Foraging rate, bees, hoverflies, 269
Functional ecology:
  clonal animals, 63
  comparative ecology, 71
  philosophies, 71
  towards a definition, 57
Fungi, metal tolerance, mycorrhiza, 415

Gas exchange, tropical forest, 169
Geochelone spp., *see* tortoise
Grasshopper:
  feeding preference, 369
  reproductive effort, 215

Grassland, canopy exchange, 423
Grazing:
  amoeba on cyanobacteria, 99
  defence in plants, 73
Growth:
  carbon dioxide enriched atmosphere, 139
  food quality, 359
  model, 195; 223
  seedlings, subarctic conditions, 37
Gull, Lesser black-backed, 275

Hawthorn:
  nectar production, 251
  flowering phenology, 261
Herbivore, defence in plants, 73
Hordeum vulgare, anoxia; flooding tolerance, 49

Interactions:
  perennial plants, 145
  snail species, 91
Intertidal photosynthesis, 387
Invasion, land snail competition, 91
Isopod:
  niche breadth, brood size, 13
  population dynamics, 359

Larus fuscus, *see* gull
Leaf size, tropical saplings, 399
Life span, pine beauty moth, 331
Light regimes, photosynthesis, 377
Lizard, water budget, 131
Locomotion, measurement device, 281

Mammals, basal metabolic rates, 25
Mayorella sp., grazing cyanobacteria, 99
Metabolic rates, basal, in mammals, 25; 160
Metal tolerance, mycorrhiza, 415
Microclimate:
  altitude effects, 179
  temperature and stature, 405
Micro-environments, tropical forest, 169
Models:
  competition, 237
  cooling, homeotherms, 151
  defence, plants, 73
  growth, 195; 223
  null, niche limitation, 391
  parental investment, 105
  population, age-structured, 327
  self-fertilizing plants, 83
Moth, pine beauty, 331
Muscle, pectoral, passerines, 353
Mycorrhiza, metal tolerance, 415
Mytilus edulis, protein turnover, 339

Nectar production, Rosaceae, 251
Nephelopsis obscura, survival strategy, 45
Niche:
  breadth, brood size, isopod, 13
  differentiation, 297; 304
  displacement, *Cepaea* spp., 91
  limitation, 391
Nitrogen:
  content, feeding preference, 369
  economy, tree seedlings, 37
  productivity model, 195
  use-efficiency, definition, 293
Nutrients, growth of tree seedlings, 37

Oryzopsis hymenoides, photosynthesis, 139
Oviposition, pine beauty moth, 331

Panolis flammea, *see* moth
Parthenogenesis, functional ecology, 63
Passerines, pectoralis variation, 353
Pepsin, digestion, marine predators, 287
Phenotypic plasticity in *Nephelopsis obscura*, 45
Philosophy, functional ecology, 71
Photosynthesis:
  altitude response, 179
  carbon dioxide enriched atmosphere, 139
  light regimes, algae, 377
  sea shore algae, 387
  trees, tropical, 3; 16
Phylogeny, basal metabolic rates, 25; 159
Pinus sp., mycorrhiza, 415
Pinus sylvestris, growth, subarctic, 37; 405
Pinus contorta, moth egg laying, 331
Pioneer tree, midday wilting, 3
Piper auritum, midday wilting, 3
Pollen transfer, 269
Pollination:
  Rosacea, 261
  self, as strategy, 83
Pollinator
  efficiency, 269
  reward, 251
Polyploid evolution, 243
Population:
  dynamics, woodlouse, 359
  models, 63; 327
Predators, marine, digestion, 287
Proasellus coxalis, niche breadth, brood size, 13
Protein turnover, mussel, 339

Ranging behaviour, tortoise, 203
Reproduction:
  capability, isopod, 13
  clonal, 161; 163
  costs, 45; 317; 321; 331

effort, 105; 215; 229
energy budget, carabids, 109
energy investment, 105
evolutionary strategy, 83
functional ecology, 63
Rosaceae pollination, 261
self-fertilization, 83
snail, competition, 91
strategy, cladocera, 223
Reproductive value, 327
Resource:
allocation, functional ecology, 63
ratio hypothesis, 297; 304
Respiration:
coefficients, 339
root, 125
Root:
growth, 117; 125
penetration, dry soil, 19
Rosaceae:
flowering phenology, 261
nectar production, 251
pollen transfer, 269
Running, measuring device, 281

Senescence, cost of reproduction, 317
Sex ratio, aphids, 321
Simocephalus vetulus, 223
Sitobion avenae, sex ratio, 321
Soil, penetration by grass roots, 19
Subarctic environment, growth of seedlings, 37
Survival:
agricultural insects, 165
costs of reproduction, 215
life-history flexibility, 45
senescence, 317

Taxonomy, basal metabolic rates in mammals, 25
Temperature tolerance, mussel, 339
Tetrazolium chloride test for anoxic sites, 49
Theory:
cooling in homeotherms, 151
defence in plants, 73
reproductive strategy, 223
Toona sp., gas exchange, 169
Timer, running animal speeds, 281
Tolerance, heavy metals, 415
Tortoise, activity and ranging, 203
Transpiration, wilted tropical tree, 3
Treeline, microclimates, 405
Trees, tropical, gas exchange, 169

Ulva lactuca, photosynthesis, 387
Understorey, gas exchange, 169

Variation:
competition, 237
seasonal, muscle, 353

Water:
budget, lizard, 131
relations, plants, 3; 125
use-efficiency, 3; 139
Wilting, tropical pioneer tree, 3
